

THE WORLD OVER

BEATTY URGES COLONIZATION

Sir Edward Beatty, chairman and president of the Canadian Northern Railway, will urge the Dominion government to launch a broad program of colonization through the Peace River country north of Edmonton.

"This north country needs a settlement plan and needs it quickly," and together with that, there should be a program of rail development," Sir Edward said after concluding a four-day inspection tour over lines of the Northern Alberta Railway.

This year he is president of the N.A.R. which is administered jointly by the Canadian Pacific and the Canadian National railways.

"The Peace River area impresses me more each time I see it. But it must get increased settlement. I would say it could use advantage at least double its present population," the railway head declared.

SUGAR FACTORY STARTED SEASON LAST MONDAY

Raymond sugar factory started operation for the season last Monday morning. The factory will work three shifts and employ about 200 workers, and the run in this season will be beyond Christmas. Beet digging started last Thursday, and 4,500 tons of beets were on hand when the season began. As the Raymond factory slices 1,300 tons daily, the supply will have to be replenished rapidly. Quality of beets is reported high and improving.

PRICE FOR DRY FODDER

Prices for feed and fodder for distribution in drought areas under the Dominion relief feed scheme, as being paid by federal buyers in the three prairie provinces are:

Grade 1—Green feed, \$4.00; hay, \$8.50, oats and barley straw, \$3.00; grade 2—Green feed, \$7.50, hay, \$7.50, oats and barley straw, \$3.50; grade 3—Hay, \$6.00.

EDSON MILL, SAID TO BE AUTHOR OF PAMPHLET

Efforts of Edmonton police in their efforts to trace authorship of the pamphlets which refers to several prominent citizens as "Bankers' Tools" and the printing shop in which they were produced have apparently been successful. A non broadcast over radio station CFCN on Tuesday stated that the author of the little pamphlet was alleged to be J. H. Edson, Social Credit member for Edmonton, and that in police court Tuesday morning he was released on bail of \$1,000.

SUB ATTACKS BRITISH VESSEL

ALICANTE, Spain.—An exciting six-hour hunt for a private submarine by seven British destroyers and two seaplanes apparently ended with a mysterious explosion and fire at sea. No explanation was given by the destroyers, but the sighting of a searchers looking for a vessel of unknown nationality that launched a torpedo against the British destroyers. Basilisk. Shore observers, however, heard numerous explosions as it came from depth bombs and reported that at least one was followed by a large column of smoke which hung over the sea for 10 minutes.

RAINS FURTHER DELAY HARVEST OVER ENTIRE SOUTH PART OF ALTA.

Rains over the week end were general in southern Alberta, extending south to the International border and east to the Saskatchewan border. The roads were just beginning to dry up from last week's storm when rain set in Saturday night and continued until Monday morning before the clouds began to clear off.

There is still considerable threatening to be done in the district and the rains will hold up operations for almost ten days, according to reports in some sections.

While rain fell in many parts, some snow was in evidence early on Monday morning the ground about three miles south of Carbon was covered with about an inch of the winter mantle, indicating freezing temperatures. Fortunately the snow did not remain for long.

LONG YEARS AGO

October 11, 1923

The town has been in darkness for more than a week, but the Carbon electric light plant will again be put in operation in the scale of the former to a statement made by G. Shull, owner of the town lighting system.

A new \$2 bill, bearing the portrait of the Prince of Wales, has just been issued.

As Archie McLeod was drawing a lot in operation on the scale of the former to a statement made by G. Shull, owner of the town lighting system.

Threshing is going slowly in the Hesketh district. More help is wanted.

A FATHER'S PRAYER

God, you have given me a son;
Now help me still my boy to rear.
Too kind to quarrel, brave to fear,
Too good for any sinful joy;
Oh, if temptation prove too strong,
Too wise to follow folly long.

God, you a son have given to me;
Help me my boy to make a man,
Help me to teach him all I can
Of honesty and decency.
Father of fathers, make me one
A fit example to my son.

—Douglas Malloch

Young Bride: "Now dear, what'll I get if I cook a dinner like that for you every day in this year?"
Hubby: "My life insurance."

WHERE CANADA LAGS

Canada is the only country which is not handling agriculture as a national activity. One has only to look within the Empire and to see what Great Britain, New Zealand, Australia and South Africa have done with respect to agriculture to realize how far behind we lag in Canada. It does not matter what we blame this lagging on; it exists, and it is a detriment to our Canadian nation as a whole as well as to agriculture with its five million direct dependents.—"Country Life in B.C."

LETTERS TO THE EDITOR

The Editor, The Carbon Chronicle.

Dear Sir:—This is in (partial) reply to the letter of Thos. J. King, published in your issue of September 28th, 1937. Mr. King says: "The collator, all behind bank loans or advances is something more substantial than ink in a fountain pen."

Did anyone ever say it was not? The inquiry of the present banking system in Canada is a good example of the real wealth and give in return ink-strokes in a Bank Ledger, which figures are literally created by the stroke of a pen.

If anyone, confronted by the welter of professional discussion of money, has not been able to absorb this plain fact, then one is tempted to believe that the banker's money is even more immature than that of the now historical "thirteen year-old kid."

Mr. King invited sarcasm. That is the only way for the preceding. It is a fact that the present money system is a failure. It is a fact that the Social Credit movement, if it is to go further in the line of the case against the bank (an overwhelming case, in my opinion) shall be pleased to lend them the literary company.

I join hands with Mr. King in his advocacy of "Co-operatives." Let people realize that self-help will solve their problems. The co-operative movement is a failure. It is a failure. I shall be pleased to discuss "Co-operatives" further with Mr. King, either personally or through your columns.

KNOW YOURSELF

(By Rev. W.H. McDonald)

If you cannot express or use a thing, it is not yours. The price of retention is expression. Paderewski declared that he could detect the lack even of a day's practice on the piano. An athlete knows how quickly his muscles stiffen and slow him up if speed, or interfere in his judgment of pace and distance. A professor in Chicago University years ago tells us that he thought he had his religion tied up in a packet and safely stored away in his desk. A crisis came in his life and when he opened the drawer there was nothing there but dust. Neglect had destroyed it. And so it is with many things that are given to us in life. Wm. James has declared that "If a person gets an idea from a lecture, he should not go to another lecture until he has done something with the idea."

It is no accident that all the important sayings of Jesus are quotations and effective until his friends have enough courage to incorporate them in their living.

Geoffie has somewhere made this pertinent remark: "The highest cannot be spoken, it can only be acted. Now what meaning has love as a theory. It is only love as acting that brings young folk into the world and identity and fellowship in a way that gives them understanding to make a home."

What meaningless rot to imagine that friendship and truth can be truly defined in talk and verbal display of verbal endorsements. The secret beauties of friendship and truth are only yielded up when they are incarnated in living for others without stint. All great truths are actable.

The church's great mission is not contradictory to this conception of truth. His chief task is to influence the home. To help parents discover love at its best and to inculcate with in their hearts the loyalty to which is beyond themselves. When

RENEWAL OF AID FOR DROUGHT AREA HAS NOW BEEN ARRANGED

The ravages of drought in portions of Western Canada are more pronounced this year than in 1936, and again the federal government has decided to treat the situation as a national emergency.

Relief for the farm families in the sun-devasted region will be undertaken as the full responsibility of the Dominion Government. Food, shelter, fuel, clothing and other essentials will be provided by Ottawa funds without charge for any contribution by provincial or municipal authorities.

Cattle in the area, now faced with heavy starvation, will be handled through cooperative machinery involving the farmers, the federal government, the provincial governments and the railways. With respect to cattle which should be kept in the area to provide milk for the farm families and to prevent stock for next year's harvest, feed and fodder will be hauled into the area by the Government and distributed to the farms.

Beef cattle will be handled under a three-year system. Government assistance will be provided to arrange for abattoir handling of cattle which should be slaughtered at once. The Dominion Government will pay the one-way railway fare of any cattle buyer from outside the drought area who desires to buy cattle; providing he buys directly from the farmer and takes the stock out for a three-month feeding period. The Dominion government will also subsidize the freight costs on such cattle shipments. Free freight will be provided on shipments of cattle of six days or less to specially selected grazing areas within the prairie provinces if the farmer, by letter, notifies the Dominion government of the purchase of the cattle; the expense being equally divided among the federal and provincial governments and the railway company.

Looking into the future, and in anticipation of later drought troubles, the various governments are whereby to create a co-operative scheme whereby areas of former ranching areas which are now virtually deserted, will be fenced off and developed into grazing lands under the Department of Agriculture. Once the grass becomes re-established in these regions it will be available for grazing emergencies in the years ahead.

The work of water conservation through the digging of dams and ditches and through forestation and other methods will be continued under the terms of the Prairie Farms Rehabilitation Act.

Quoted by the federal cabinet released from a detailed report submitted by the Minister of Agriculture of the Dominion of Canada, the report was based upon a trip of personal investigation which took him, and Hon. Norman Robertson, Minister of Labour, to all parts of the drought-ravaged area. Mr. Gardiner reported that the drought was the most serious of 400,000 persons in Saskatchewan and Alberta, and that close to a quarter of a million head of cattle would have to be moved out.

While this year's drought area is smaller than that of a year ago, the severity of drought in the affected regions is more marked.

God gave his perfect revelation to the world, it was a life, a way of action. It was His word made flesh. So likewise the parents must learn to incarnate into their actions, conduct and life the principles they want their children to imitate. Then they will be inwardly prevented from making an idea from a lecture, he should not go to another lecture until he has done something with the idea."

It is no accident that all the important sayings of Jesus are quotations and effective until his friends have enough courage to incorporate them in their living.

Geoffie has somewhere made this pertinent remark: "The highest cannot be spoken, it can only be acted. Now what meaning has love as a theory. It is only love as acting that brings young folk into the world and identity and fellowship in a way that gives them understanding to make a home."

What meaningless rot to imagine that friendship and truth can be truly defined in talk and verbal display of verbal endorsements. The secret beauties of friendship and truth are only yielded up when they are incarnated in living for others without stint. All great truths are actable.

The church's great mission is not contradictory to this conception of truth. His chief task is to influence the home. To help parents discover love at its best and to inculcate with in their hearts the loyalty to which is beyond themselves. When

Rudy Martin has purchased a 1934 Chevrolet sedan from S. J. Garrett. Johnny Oshausser is also the owner of a new car, having purchased a 1935 coupe last week.

Wedding bells will soon be ringing for Katie Oshausser and Rudy Martin, and they intend to live in Chris. Martin's farm, south-east of town.

LAWRENCE PAXON BUYS BROOKS' AUTO ELECTRIC

The following item appeared in the last issue of The Drumheller Mail: Lawrence Paxon, son of W. Paxon, president of Red Bus Lines Ltd., has purchased the business known as Brooks' Auto Electric, situated on First street west. At six o'clock this afternoon (Thursday) the business passes into the hands of Mr. Paxon, the deal being closed over the week-end.

Clarence Brooks, who established the business here several years ago, will continue to operate for Mr. Paxon for the next few months.

WEEKLY COMMENT ON THE WORLD OF WHEAT BY H. G. L. STRANGE

The world's millers are now paying a price for the top grades of Canadian wheat that is unusually high when compared with the prices they are offering for other sorts.

Why this should be, when wheats are arriving from Australia, Argentina, Roumania, Russia, India, the United States and other countries? The reason, it appears, is as follows:

The wheats arriving in Europe from Britain competitors are not, as yet, up to their usual fair quality. Millers, therefore, find it necessary to use a small percentage of high grade "Manitoba" to bring their flour "mix" up to average quality.

But Canada has only a small quantity of these high grades available, hence millers are bidding keenly for them.

Canada would have 1, calculate, about 30 million bushels for export, but 21 million bushels is Durum and 12 million Garb, leaving something less than 50 million of our best soft wheats for overseas sale, or less than a million bushels a week.

"Manitoba" last 1 depends mainly upon whether the quality of the wheats from Canada's competitors improves, or whether millers find a way to make good flour with the lower sorts.

Following factors have tended to raise prices:

Hard and winter Roumanian wheat. Continued wet weather hindered Italian corn gathering and wheat sowing. Boatsmen's competition for wheat crop. "Carry-over" stocks in European importing countries recently diminished. Drought in Southern South Africa wheat crop. Austria negotiating for Roumanian wheat and rye.

Following factors have tended to lower prices:

Expect Italy will soon order corn meal to be milled with hard flour. Lack of available ocean tonnage. European importing countries may import no more wheat than in 1936. General improvement after rains in Argentine. Conditions favour large Durum wheat acreage. Roumanian wheat crop from Palestine. Limited gold supplies in importing countries.

DELEGATION REQUESTS VILLAGE COUNCIL TO GRAVEL LOCAL STREET

A large delegation of taxpayers attended the Monday night meeting of the Village Council and requested the Council to give serious consideration to the graveling of the street leading from the Masonic hall north to the S. F. Torrance residence. Owing to the heavy rain and many times in the past, this street has become almost impassable and the taxpayers present were trying to win the opinion that something should be done to relieve the situation.

We understand that Mayor Garrett has stated that the graveling of the road in question will be considered by the Council.

LEGISLATURE PASSES BANK AND PRESS BILLS; PROROGUES TUESDAY

EDMONTON.—Clearing the order paper of all business, including legislation, the fifth session of the eighth Legislature of Alberta adjourned at 12:30 on Tuesday, to meet again at 2 p.m. on the 11th inst.

Considerably amended, the provincial government's bank control for regulation of the credit of the province of Alberta legislation was passed through the committee of the whole assembly and was given third reading.

In reprinted form the bill appeared under the caption of the "Credit Regulation Act" and it disclosed that every mention of bank, banker or money was struck within the normal word "credit institution" or "business of dealing in credit" had been substituted.

It was provided in the reprinted bill that "credit transactions" are those included within the meaning of "banking" as used in section 91 of the B.A. Act.

In the press bill it is provided that the government will have a period of 31 days in which to correct or amplify any one or more of the amendments published in a newspaper. Formerly no period was stated.

Also, the government has modified its demand for free space in which to correct statements and is asking now only for one-half page instead of a whole page in dailies and by striking out demands for one whole page in the whole issue. Another amendment provides that "every statement as reported in a newspaper" shall be in the language of such newspaper.

By amending the House ran through three bills, the bill to amend the debt adjustment act; the bill to amend the law relating to the licensing of trade and business act, and the pipe line act.

The licensing of trades and businesses act was to a large extent shorn of most of its sharp teeth.

OIL RATE CUT 50 PER CENT

Freight rates on Calgary and Regina on "casing-head" gas from Tarascoe to have been voluntarily reduced by railways from 60 cents per 100 pounds to 30 cents per hundred, and the new rate is now in effect, according to an announcement made by the Calgary head gas form.

The casing-head gas is a form of unrefined gasoline recovered at Naphtha-producing wells, which is used extensively in the blending and refining of high-grade gasolines. It is of too high grade for use in motors in its raw form, but by blending with crude oil in refineries required grades of gasoline are produced.

By allowing the Turner Valley product to reach the Regina refinery at lower rates the new rates will do much to stop "hoarding" of Montana blending gasoline across the border, local oil men declare.

MEN AT WORK

On August 1st, 1937 Canadian employees reported to the Dominion Bureau of Statistics a total of 1,142,106 persons at work, compared with a total of 1,088,652 on June 1st; an increase of 54,454 for the two-month period.

During the month of July new employments were provided for 45,600 persons; which was decidedly above the average July figures during the past 16 years.

The index of employment (using the year 1926 as 100-normally stood at 120 on August 1st, 1937; which was 14 points higher than on August 1, 1936.

DINOSAUR EGGS?

Waterton, Alta. — Paleontologists will be asked to verify what is believed to be a nest of petrified dinosaur eggs, laid perhaps sixty million years ago, and discovered following a landslide during a mountain highway construction job in the Waterton National Park, 45 miles southwest of Lethbridge.

They may be a world find. The only other dinosaur eggs ever discovered were found in Mongolia.

The petrified eggs are nine inches long and six inches in diameter. The nest is more than three feet in diameter.

During the millions of years since the dinosaurs roamed Alberta valleys time has formed a perfect crust of rock over the nest.

Dr. C.M. Sternberg, paleontologist, a member of the Geological Survey of Canada, from Ottawa, carried on field research work in the fossil beds of the Cypress Hills this summer making many valuable finds. Bones of a flesh eating dinosaur, which he estimated lived 60,000 years ago, were found.

A road crew, blasting out rock on the chief mountain highway, the connecting link between Waterton National Park and Glacier National Park in Montana, found the nest. It is now at the park engineer's office.

It was discovered a year ago but little attention was paid to it then.

LIBERTY OF THE PRESS

From a Speech by John M. Irwin,
Managing Director of the
Edmonton Journal

In Canada, as in all other Anglo-Saxon countries, there is today a so-called "liberty of the press." Except in a few minor respects that liberty is no greater and no less than the liberty of the individual. Both were won only after centuries of struggle. In their continuance, as in their acquisition, the two aspects of liberty are closely and inseparably interwoven.

In United States freedom of the press is guaranteed in the constitution which provides that "Congress shall make no law abridging the freedom of speech or of the press." In other Anglo-Saxon countries the tradition of a free press is rooted so deeply and the need for it is evidenced so clearly as to make it unlikely that any such will submit to its withdrawal unless and until there is a willingness to surrender freedom of speech and civil rights also.

That is all I will say personally at this time about a subject that is causing much discussion in this province. But I would like to quote from others whose standing is such as to give weight to their opinions. These were uttered at different periods of history and of course one must consider conditions at time of utterance as well as measure of applicability to conditions as of today.

Charles James Fox, speaking in the House of Parliament at Westminster said: "English freedom does not depend on the executive department nor upon the administration of justice, nor upon any one particular part, nor even upon forms, so much as it does on the general freedom of speech and of writing. I have never heard of any danger arising to a free state from the freedom of the press, or freedom of speech. So far from it, I am perfectly clear that a free state cannot exist without both."

In the same debate Richard Brinsley Sheridan said:

"Give me but the liberty of the press and I will give to the minister a venal House of Peers. I will give him a corrupt and servile House of Commons. I will give him the full swing of the patronage of office. I will give him the whole host of ministerial influence. I will give him all the power that place can confer upon him, to purchase up submission and overcome resistance; and yet, armed with the liberty of the press, I will go forth to meet him undismayed. I will attack the mighty fabric of that mighty engine. I will shake down from its height corruption and bury it beneath the ruins of the abuses it was meant to shelter."

This Will Please The Children

By BETTY BARCLAY

Are you ever confronted with "milktime blues" so far as your children are concerned? The adults will eat what is placed before them, but children quite often have decided likes and dislikes—and many household foods they need, are among those they refuse.

Perhaps they even ignore milk. An endless renaissance made without baking or boiling is an easily-prepared milk-containing dessert that will be relished by these little "problem" of yours. Through it, healthful food will be served in a form that will please. Such a dish is economical and easy to digest. Try the dessert below—and see how much it is appreciated by the children.

Chocolate Delight

1 package chocolate rennet powder
1 pint milk (not evaporated or condensed)
4 or 5 marshmallows

Blackberry jam

Salute rennet-curdled according to directions on package. Chill in refrigerator. When ready to serve, cut marshmallows in eighths from one side almost to the other. Open like a flower and place on top of each dessert. In the center of each flower put a teaspoon of blackberry jam.

For SNOW and MUD The Goodyear STUD

● The kind of going that makes heavy weather for ordinary tires is "pie" for Goodyear Studded Tires. They bite in and keep you moving—under control every second. You waste no time—or gas and oil—in wheel spins, slips and skids.

Goodyear Studded Tires are designed, built and proven for off-the-pavement driving and to defy deep snow. Farmers, salesmen, postmen—all who travel muddy roads need them. To the country doctor they are well-nigh indispensable. Smooth-riding Goodyear Studded Tires give a new sense of driving security to every off-the-pavement driver. See them at your Goodyear dealer's—at the same low price as Goodyear All-Weather Treads.

GOODYEAR

PAY YOUR SUBSCRIPTION?

YES SIR! WE APPRECIATE THEM

THE OTHER DAY WE ASKED A MAN FOR HIS PRINTING AND HE TOLD US:

"OH, OUR PRINTING DOESN'T AMOUNT TO MUCH. ALL WE HAVE IS A FEW SMALL ORDERS, AND NONE OF THEM EVER RUN INTO ANYTHING THAT LOOKS LIKE MONEY."

THOSE LITTLE ORDERS ARE THE KIND THAT MAKE OUR BUSINESS.

MOST OF OUR BUSINESS IS IN PRINTING LETTERHEADS, ENVELOPES, CIRCULARS, POSTERS, OFFICE FORMS, AND OTHER SMALL ORDERS.

WE APPRECIATE A SMALL ORDER AS WELL AS WE DO A BIG ONE.

SO, IF YOU HAVE ANY SMALL ORDERS FOR PRINTING, WE WANT YOU TO KNOW THAT WE ARE GLAD TO GET THEM. WE APPRECIATE THEM JUST AS MUCH—AND TAKE JUST AS GOOD CARE OF THEM—AS IF THEY ACTUALLY AMOUNTED TO HUNDREDS OF DOLLARS.

TOWN & COUNTY
Personalography

Mr. and Mrs. C. Cressman have
moved into the house recently vacated
by Mr. and Mrs. Otto Schiele.

Mr. L. B. Hart has been seriously
ill with pneumonia for the past ten
days and we hope that he will have
a speedy recovery. Latest reports are
that his condition is improving.

Elmer Hill has been busy the past
week fixing up Charlebois home next
door to the Alex Reid residence, which
was formerly occupied by Mr. and
Mrs. W.H.T. Olive, who have moved to
Calgary.

J. H. Oliphant returned last Wed-
nesday from a business visit in Cal-
gary.

Mrs. Perry Wheat was a Calgary
visitor last Thursday.

Rev. W. H. McDonald conducted the
funeral service at Drumheller on
Thursday last for the late Alex. H.
Storvick, who had been away recently
by near his home at Michell. Later
Mr. McDonald went to Stettler to
conduct services at the graveside. He
returned to Carbon Friday morning.

Monday, October 11 has been pro-
claimed Thanksgiving Day by the Do-
minion government, and all business
places will remain closed.

Born, to Mr. and Mrs. Cyril Oliph-
ant on Monday, October 4th, a son.

The teachers' convention is being
held at Drumheller this week, and
many of the teachers in the district
are attending.

Miss Nancy Penner of Carme is
nursing at the Oliphant home.

Mr. and Mrs. W. Foxon of Drum-
heller were Carbon visitors Saturday.

Mr. and Mrs. W. Holmes of Cal-
gary are spending a vacation at the
home of Mrs. Holmes' parents, Mr.
and Mrs. W. A. Braisher.

Large potatoes are the topic of
discussion on the streets these days,
and we understand that the weights
for individual tubers has now risen to
almost the six-pound mark.

Mrs. Elliott spent the weekend en-
joying in Drumheller with Mr. and

JUNIOR WHEAT CLUBS

The maintenance of quality in
wheat production in Alberta is a mat-
ter of vital importance to the province.
Probably the most successful plan yet
devised to encourage the use of good
seed is the development of the Junior
Wheat Clubs. This undertaking is
carried on under the supervision and
direction of the Field Crops Branch,
Department of Agriculture, Edmonton
together with the Alberta Wheat Pool
in co-operation with the Dominion
Government's National Council on
Boys' and Girls' Clubwork.

The boys engaged in this Junior
Wheat Club work are at the age when
impressions sink deeply. They are be-
ing impressed with the value of good
seed in a very practical way. The les-
sons should stay with them during
their lives. This year 600 boys have
participated in this work.

The boys produce the seed them-
selves, and being scattered the length
and breadth of the arable section of
the province, a considerable volume
of excellent seed is provided over an
extensive area each year. In addition
adult farmers become interested and
in most districts where clubs operate
the general tendency is of good
higher standard of seed grown.

The Alberta Wheat Pool takes an
extensive part in this work in the
firm belief that through the Junior
Wheat Clubs a real service is being
rendered to agriculture in Alberta.

"Well, Mary," said the minister
kindly, "you didn't come to our little
gather last night, after all. How
was that?"

"Please sir, I had a little gathering
of my own that prevented me."

"Oh! and where was it?"

"If you please sir, it was on the
back of my neck."

The
"Big Interests"
in
Life Insurance

Are the Policyholders
and Beneficiaries

IN Life Insurance, the "Big Interests" are
the millions of Canadian policyholders and
beneficiaries—men, women and children who
share in the protection made possible by in-
dividual thrift and foresight.

The concern of those who act on behalf
of these policyholders and beneficiaries is to
safeguard their interests. Their accumulated
savings, amounting to more than two billion
dollars, must be invested wisely to obtain the
greatest yield consistent with safety. Every
promise made in Life Insurance policies must
be fulfilled completely and promptly.

Canadian policyholders may feel justly
proud of the wise and careful administration
of their trust funds. Even in the darkest days
of the depression, their companies met every
obligation promptly and fully—bringing
financial security to thousands of Canadian
homes.

There is added satisfaction in the fact that
the investment of Life Insurance funds has
helped to build Canadian homes, schools and
hospitals—and develop agriculture, indus-
tries and public utilities. Thus, the whole
Dominion benefits from Life Insurance.

In the future, as in the past, Canadian
policyholders and beneficiaries must always
be the "Big Interests" of Life Insurance.

provement plans with you.

BANK OF MONTREAL

● The toughest kind of going has met more than
its match. Goodyear self-cleaning Lug Tires for
trucks and buses roll steadily through mud and
snow that's rim deep. They travel skiddy curves
and greasy ruts with ease. On all "un-paved"
routes they give the driver of truck, bus or
tractor a new sense of driving security.

The marvellous traction-power of Goodyear
Lug Tires makes them indispensable to any
driver who leaves the smooth, paved highway.

At your Goodyear dealer's now.
